- (9) Cutting out defective joints and replacing them with Britannia joints as per specification, at per joint (only where directed by the inspecting officer);
- (10) Price, per pole, for chipping off and removing decayed or loose sapwood.

General Conditions.

1. The words "Inspecting Officer" throughout these conditions and specifications shall mean any officer appointed by the Postmaster-General to supervise the work.

2. The word "Contractor" throughout these conditions and specifications shall mean all and any of the partners of a firm, or any single individual.

3. The wire insulators, insulator spindles, galvanised iron roofs, roof nails, lightning conductors, and staples for lightning conductors will be supplied by the Government and delivered to the contractor in Brisbane. The quantities issued will be upon the proper estimate and requisition of the contractor, who will be held responsible for applying for sufficient, and any surplus material after the completion of the contract must be delivered by the contractor, free of charge, at the Stores of the Post and Telegraph Department, Brisbane.

4. The whole of the works included in this contract must be completed and handed over to the Government within six (6) weeks of the notification of the acceptance of the tender; and should the completion of the works be delayed beyond that date, the contractor shall forfeit and pay to the Government, as and for liquidated and ascertained damages, the sum of five pounds sterling for every week or part of a week that shall elapse after such date until their completion, and the amount of such damages may be deducted by the Government from any money payable to the contractor under this contract.

5. Payment will be made monthly to the extent of seventy-five (75) per cent. on the value of the work reported to have been completed by the officer appointed to inspect the same; but, notwithstanding such report and payment on account, the Under Secretary and Superintendent of Electric Telegraphs, or other officer appointed by him in that behalf, shall have full power at any time afterwards, before final payment shall be made, of rejecting and condemning any of the work or materials in respect of which such report and payments may have been made. Certificates must be produced from the Chairman of the Divisional Board through whose Division the line passes, and from property owners if through or near the boundaries of private lands, that no claims are made by them under Clause 7, before final payment will be made. The total balance will be paid when the entire contract shall have been completed and all claims settled to the satisfaction of the Government.

6. The contractor will be held responsible for any interruption to the working of the line caused by himself or his employees. If any such interruption should occur, the contractor will have to defray the cost of repairs; and in the event of default to do so on the part of the contractor, the Under Secretary and Superintendent of Electric Telegraphs will have the power to defray the cost of all or any such repairs from moneys due to the contractor.

7. The contractor may avail himself of the facilities afforded by "The Post and Telegraph Act, 1891," for obtaining materials, on signing a bond indemnifying the Government against any claims for compensation arising from the action of the contractor: Provided always that it shall be lawful for the Under Secretary and Superintendent of Electric Telegraphs, from moneys due to the contractor, if not otherwise settled, to satisfy any such claim he may see fit.

8. No action or suit shall be brought or maintained by the contractor or the Under Secretary and Superintendent of Electric Telegraphs against the other of them to recover any money for or in respect of or arising out of this contract, or any breach thereof by the contractor or the Under Secretary and Superintendent of Electric Telegraphs, or for or in respect of any other matter or thing arising out of this contract, unless and until the contractor or the Under Secretary and Superintendent of Electric Telegraphs has obtained a certificate of the inspecting officer for the amount sued for, and then only for the amount so certified.

9. The contractor will have to provide, at his own cost, all labour, plant, tools, material (other than that mentioned in Clause 3 of these conditions), or whatever else may be required for the due performance of this contract.

10. The contractor will be responsible for all claims for compensation for damage to fences or other property caused by the erection of the line, also for damage so caused to roads; and if such claims are not defrayed, the Under Secretary and Superintendent of Electric Telegraphs is authorised to pay the same from any moneys due to the contractor.

11. Should the contractor fail to proceed in the execution of, or to complete, the work in the manner and at the rate of progress required by the Postmaster-General, it shall be lawful for the Postmaster-General, by a notice in writing delivered to the contractor or his representative, or by a notice in the *Queensland Government Gazette*, to terminate the contract, as far as relates to the work remaining to be done, and to enforce the penalties for the non-fulfilment of the contract; and all sums of money which may be due to the contractor, together with all plant, materials, and implements in his possession on the ground, and all sums of money, whether named in the bond to be entered into by the contractor and his sureties, or otherwise, as penalties for the non-fulfilment of the contract, shall be forfeited to the Government, and the amount shall be considered as ascertained damages for breach of contract.

12. A deposit of a sum equal to ten (10) per cent. of the total tender cost of the whole work must accompany each Tender (without which Tenders will be informal), also a memorandum signed by the party tendering, and two responsible persons as sureties, agreeing to be answerable for the due performance of the contract within the time stipulated, in the event of the Tender being accepted, and undertaking in that event that they will severally execute and deliver at the Office of the Under Secretary and Superintendent of Electric Telegraphs, in Brisbane, within ten (10) days from the date of the notification of the acceptance of the Tender, a bond to Her Majesty in a sum equal to twenty (20) per cent. on the amount of the Tender.

13. All workmen and employees engaged upon the works by the contractor shall be paid their full wages in lawful money, at least once in every month.

14. Such payments shall be made in some building or place convenient to the site of the works, but in no case shall such payments be made at any public-house or other place where liquors or refreshments are sold.

15. The contractor shall not sell or dispose of, or be in any way interested in the sale or disposal of, alcoholic liquors or other articles of consumption, to the workmen or employees engaged upon the works.

16. If the contractor sublets any portion of the works, all workmen and employees engaged thereon shall be paid by the sub-contractor at the times and under the conditions herein specified, but in the event of the sub-contractor failing to make any such payments then the contractor shall be liable to make the same.

17. Before the payment of any money to the contractor, the Postmaster-General may require from him satisfactory evidence that all the workmen and employees then and theretofore engaged upon the works have been paid their wages and other lawful claims of every kind in full, in lawful money, and to the latest date at which such wages and claims are due; and the Postmaster-General may withhold the payment of all moneys due or that may become due to the contractor, until he is satisfied that such wages and claims have been paid.

18. If the contractor fails or omits to pay to any workmen or employees engaged upon the works their full wages in cash once at least in every month, the Postmaster-General may,

as often as the same shall happen, upon complaint of such failure or omission made, and upon evidence satisfactory to him of an order or judgment of a Court of Petty Sessions, or of any other court of competent jurisdiction, pay the amount mentioned in such order to such workmen or employees, and deduct the amounts so paid from any sum or sums which may be due or become due to the contractor.

19. Although the Under Secretary and Superintendent of Electric Telegraphs or his officers may furnish any information in connection with this contract, any such information shall not relieve the contractor from any risk or from the fulfilment of his contract, nor will the fact of any such information being given entitle the contractor to make any claim for compensation.

20. The inspecting officer shall have the power to order the dismissal or removal of any foreman or workman employed by the contractor upon giving written notice to the contractor of his intention to do so; and if such foreman or workman is retained by the contractor after such notice has been given, then the inspecting officer shall have the power to delay the signing of any voucher or certificate for payment for any work done until such order has been obeyed.

21. The decision of the Government Electrical Engineer will be final in all matters of dispute between the contractors and the Government in regard to this contract.

22. The contractor must shift camp for the inspecting officer as required.

23. A copy of the conditions and specification, signed by the contractor, and duly witnessed, must accompany each Tender.

18. The Government does not bind itself to accept the lowest or any Tender.

Specification.

1. Clearing of undergrowth, where necessary, to be carried out in accordance with and in the manner specified in Clauses 2, 3, 4, 5, and 6. Clearing is only to be done in such places as the inspecting officer may direct.

2. All dead timber and underwood standing within forty (40) feet on each side of the line to be felled; and all fallen timber, whether felled by the contractor or otherwise, dead logs, old poles, and fallen undergrowth, within a radius of twenty (20) feet from each pole, to be cleared away.

3. A bridle track of not less than eight (8) feet in width to be cleared of all logs and fallen timber or undergrowth: this track must be in the centre of the clearing, unless directed otherwise by the inspecting officer. Where the road is within the clearing, a bridle-track will not be required.

4. Any branches overhanging from trees beyond the distance mentioned, which, in the judgment of the inspecting officer, might endanger the line, to be removed. Every care must be taken not to damage fencing or any other property.

5. Trees outside the distance mentioned (40) feet, which, in the judgment of the inspecting officer, might endanger the line, are to be felled.

6. All existing cleared roads which may become blocked by fallen timber or undergrowth must be cleared by the removal of the timber or undergrowth to the original width of such roadway. In cases where tracks may become blocked, all fallen timber must be removed, leaving a clear space of not less than twenty (20) feet in width, following the course of such track.

7. Poles to be straight saplings of the best description of narrow-leaved ironbark or other approved timber (the approval of any timber will rest with the Government), with the bark removed, not less than six (6) inches in the least diameter, clear of sapwood, at the small end, and not less than thirty-one (31) inches in circumference at five (5) feet from the butt, and not less than twenty-seven (27) feet in length; to be carefully and thoroughly charred from the butt upwards to one (1) foot above the ground, the charred portion to be well coated with hot coal tar. Extra-length poles to be three (3) inches greater in circumference at five (5) feet from the butt for each additional five (5) feet in length.

8. The top of each pole to be sawn off with a bevel of one (1) in one (1) on each side, so as to leave an equal slope on each side of the pole. Over the top thus formed the galvanised iron roof to be neatly fitted and nailed to the pole with four (4) two (2) inch clout nails, two nails on each side. The iron roof must project beyond the pole on all sides, not less nor more than two (2) inches.

9. Each new pole to have two (2) iron brackets affixed, one on each side and at right angles to the line of the wires. All sapwood must be cut away under each bracket so that they will lie firmly on the sound timber of the pole. The top bracket to be affixed at nine (9) inches from the top of the pole, and on the right-hand side looking to the "Up" Station (Brisbane side); the other bracket to be on the opposite side of the pole and seven (7) inches lower than the other. All brackets are to be fastened to the poles by means of three (3) 3-inch coach screws.

10. Existing poles which it is not intended to replace by new ones are to have all loose or decayed sapwood carefully chipped off and deposited outside the twenty (20) feet radius around the pole.

11. On the existing poles which it is not intended to replace with new ones any brackets which may be broken or loose, or in which the screws may not be thoroughly screwed home, shall be removed. A new seat for the bracket shall be formed

by removing the sapwood, and the brackets shall then be re-screwed. New holes must be bored for the screws, which are not under any circumstances to be driven in the former holes. All such brackets are to be fastened to the poles by means of three (3) inch coach screws.

12. Lightning conductors to be of No. 8 gauge galvanised iron wire, to be stretched straight from the top to the butt of each pole, and to be secured thereto with fourteen (14) staples of galvanised iron wire one and a-half (1½) inches in length. Staples bent in driving must be drawn and replaced by straight ones. The top of the conductor to be twisted once round a three (3) inch coach screw driven four (4) inches below the top of the pole, and then bent so that it will project not less than six (6) inches above the iron roof on the top of the pole; the other end of the conductor to be bent under the butt of the pole. If the poles exceed the specified length, the lightning conductors shall be proportionately longer, and an additional staple shall be driven for every two (2) feet additional length. Where poles are alongside roads, the staples to be driven at every foot from the ground to a height of eight (8) feet. Lightning conductors to be affixed to the poles midway between the brackets, on the "Up" station side.

13. The poles are to be erected in the position indicated by the inspecting officer; to be sunk five (5) feet in the ground, placed in a perpendicular position, and well rammed with rubble or earth. Extra-length poles to be sunk any extra depth in the ground that the inspecting officer may direct.

14. At angles and other places where required, struts are to be supplied and fitted. Struts are to be of approved timber (approval rests with the Government); to be about twenty-one (21) feet three (3) inches in length, sawn off square at the butt; to be not less than six (6) inches, clear of sapwood, in the least diameter at the small end, and not less than twenty-four (24) inches in circumference at the butt. Struts should not weaken the pole; therefore as little as possible of the timber of the pole inside the sapwood should be cut away at the joint. The small end of the strut is to be carefully and neatly scarfed to fit the pole at seventeen (17) feet from the ground level for a twenty-seven (27) foot pole. The joint must be neat and well fitting. A one-half (½) inch bolt is to be used to fasten the head of the strut to the pole. All sapwood must be removed under both heads of bolts and nuts. The inspecting officer will give instructions as to the angle at which the strut is to be placed against the pole.

Where the inspecting officer so directs, a block is to be securely fitted to the foot of the strut. The ground must be undercut to take the strut block, so that any pull may be against unmade ground. In the event of the inspecting officer so directing, a base block must also be fitted to such poles.

Dimensions of base blocks for these purposes to be three (3) feet in length by eight (8) inches in diameter, clear of sapwood. The block must be of approved hardwood, and must be thoroughly charred before it is bolted to the pole. Any loose charcoal must be scraped off both strut, pole, and block before being bolted together. Blocks to be bolted to either struts or poles with half (½) inch bolts. Struts must be not less than three (3) feet in the ground.

Angle poles must have a slight batter or rake from the vertical at the top to allow for settling. This batter must on no account exceed twelve (12) inches. Care must be taken that the batter or rake is against the strain.

15. Where the wire requires to be re-tied to insulators on such poles as are not to be replaced by new ones, such re-tying must be done by the contractor.

16. The wire is to be stretched in accordance with instructions to be given by the inspecting officer.

17. All insulators must be perfectly clean when placed upon the insulator pins; and if the inspecting officer considers that the insulators require washing, the contractor must wash them before they are placed on the poles. Clean fresh water must always be used when washing is required.

18. All joints are to be of the pattern known as the "Britannia" joint. The ends of the line wire where joined are to be thoroughly cleaned with a file or emery cloth; the ends are then to be laid together and whiplashed round for two and a-half (2½) inches with No. 16 binding wire, which must also be thoroughly cleaned. The whole joint is then to be carefully soldered. Baker's soldering fluid, only, to be used as a flux. A supply will be provided by the Government.

19. The line wire is to be tied to the insulators with the binding wire supplied for that purpose and in the manner prescribed.

20. All material used in the construction of this work, or any part of it, must be of the best quality, and, together with the workmanship, is to be subject to the final approval or rejection of the Electrical Engineer, or any officer appointed by him to inspect the same.

Tender forms, and every other information, may be obtained on application at the Office of the Under Secretary and Superintendent of Electric Telegraphs, Brisbane, or the Railway Stations at North Pine, Strathpine, Bald Hills, or the Post and Telegraph Office, Redcliffe.

PAYMENTS UNDER "THE CROWN LANDS ACTS, 1884 TO 1895."

THE accompanying Schedules of the Payments due on the 31st March, upon Selections under the above-mentioned Acts, are published for general information; and it is hereby notified that the payment of rent on any Selection included in these Schedules or otherwise will not place the Selector in a better position to claim a title in the event of it coming within the knowledge of the Government that any other provisoes or conditions of the Act, or of the leases under which the lands are held, have been violated.

If default is made by a Lessee in the payment of rent due the lease becomes forfeited, but the Lessee may defeat the forfeiture by payment of the full annual rent within ninety days from the 31st March with the addition of a sum by way of penalty, calculated as follows, that is to say—if the rent is paid within thirty days five per centum is to be added, if the rent is paid within sixty days ten per centum is to be added, and if the rent is paid after sixty days fifteen per centum is to be added; but unless the whole of the rent together with such penalty is paid within ninety days from the appointed day the lease shall be absolutely forfeited.

NOTICE TO MARINERS.

THE following Notice to Mariners is published for general information.

HUGH M. NELSON.

SOUTH AUSTRALIA.

No. 1 of 1897.

GULF OF ST. VINCENT.

PT. ADELAIDE RIVER.

REFERRING to Notice to Mariners (No. 6 of 1896) dated 14th December, 1896, notice is hereby given that on and after Monday, the 8th February, 1897, the Beacons in the Port Adelaide River will be lighted by Electricity.

Consequent on the above the whole system of Buoys and Light Beacons will be rearranged.

Light Beacons Nos. 1, 2, 3, and 4 of the present system will be discontinued.

All Buoys marking the channel will be removed on the 8th instant except the two outside of the Lighthouse, two Black Buoys near the Old Boat Channel, and two Mooring Buoys (for vessels with explosives) in Lipson Reach.

The new system consists of (5) five pairs of Leading Lights and (8) eight Single Light Beacons.

The pairs of Leading Lights and Single Light Beacons will be numbered from seaward, instead of in the opposite way, as at present—that is to say, No. 12 and the light behind it of the old system will be No. 1 of the new, and so on.

The near Light of each lead will be Red, and the far one White, except in the case of No. 1 lead, where the far Light will be Red, as at present, and the near one White; these two have not been altered—because the Red Light of No. 1 on with No. 2 is an established lead over the Ocean Steamers' Mooring Buoy, and the White Light of No. 1 on with No. 2 leads over the Bell Buoy on Wonga Shoal.

The two Lights of No. 1 lead through the Outer Cutting near the Lighthouse, as at present.

Nos. 2 to 9, inclusive, are Single Lights, and will mark the edge of the Channel from opposite the Old Boat Channel to Mutton Cove.

Nos. 10, 11, 12, and 13 are leads, i.e., pairs.

No. 10 is placed on the shore abreast of the two Mooring Buoys for vessels with explosives, and leads from Mutton Cove half-way up Lipson Reach.

No. 11 is placed near the Torpedo Station, and leads up the other half of Lipson Reach to the North Arm.

No. 12 is placed on the Swamp south of the False Arm, and leads from the North Arm to the False Arm.

No. 13 is placed on Snowden Beach, and leads from the False Arm to Luff Point.

The following sailing directions are published for general information:—

By Night.—In approaching the Entrance to the River the Lights of No. 1 lead should, as formerly, be brought in line on a N.E. by E. bearing and be kept in line, which will lead between the outer Black and Red Buoys and through the Outer Cutting. After passing the Reflecting Beacon gradually alter course so as to pass the White Light of No. 1 lead at a reasonable distance.

From a safe distance off No. 1, steer for a like distance off No. 2, and so on from Beacon to Beacon round the point until No. 9 is reached. From a safe distance off No. 9 the Lights of No. 10 lead will be seen. Keep them in line until the red light is about a quarter of a point open to the right of the White Light of No. 11 lead, then gradually alter the course to bring the lights of No. 11 lead in line. Keep them in line (a sharp lookout being kept for the Mooring Buoys on the starboard hand) until the lights of No. 12 lead are seen coming into line. Proceed as before by altering the course before the Lights are on with each other. The same applies in the change from No. 12 to 13 leads. When the Lights on the wharves are seen opening out off Luff Point alter the course so as to round the point at a safe distance, and then up the centre of the Channel, looking out for the Mooring Buoy on the starboard hand.

By Day.—The directions by day are the same as by night, merely substituting the Beacons for the Lights.

In going outwards the directions are just the opposite to those given for coming inwards; but in such case in changing from one lead to another the course should be gradually altered when abreast of the Low (Red) Beacon of each lead.

NOTE.—The Beacons from Nos. 1 to 9, inclusive, are placed from 15 ft. to 20 ft. shorewards from the edge of the cutting.

A new Chart of the Port Adelaide Harbour and River and the Semaphore Anchorage, showing the alterations herein referred to, as well as other corrections to January last, may now be obtained at the Marine Board Offices; price, 2s.

This affects Charts Nos. 2389 A and B, plan 1750.

THOS. N. STEPHENS, President Marine Board.

Marine Board Offices, Port Adelaide, 1st February, 1897.

NOTICE is hereby given, that, under the provisions of "The Customs Act 1873," I have appointed the Exhibition Buildings and Grounds, situated at Bowen Park, near the city of Brisbane, in the colony of Queensland, and used by the Queensland International Exhibition Company, Limited, to be a warehouse where goods and merchandise liable to the payment of Customs duties, and which may be intended for exhibition at the Queensland International Exhibition, to be opened on the 5th May next, may be temporarily warehoused, kept, and stored without the payment of duty on the first entry thereof, or for exportation.

BOLTS, NUTS, AND WASHERS.

TENDERS will be received at the Office of the Under Secretary and Superintendent of Telegraphs, Brisbane, until Noon on MONDAY, the Fourteenth day of March, 1897, from persons desirous of contracting for the Supply of Five Thousand (5,000) Bolts and Nuts, and Ten Thousand (10,000) Washers.

General Conditions.

1. The word "Contractor" throughout these conditions and specifications shall mean all and any of the partners of a firm, or any single individual.
2. Payment will be made monthly, on the certificate of the Electrical Engineer, to the extent of seventy-five (75) per cent. on the value of the bolts, nuts, and washers completed and delivered at the Stores Branch of the Post and Telegraph Department, Brisbane. The total balance will be paid when the entire contract has been completed to the satisfaction of the Electrical Engineer.
3. Should the contractor fail to proceed in the execution of or to complete the work in the manner and at the rate of progress required by the Government, it shall be in the power of the Government, by a notice in writing to the contractor or his representative, or by a notice in the *Queensland Government Gazette*, to terminate the contract as far as relates to the work remaining to be done, and to enforce the penalty for non-fulfilment thereof, by forfeiting any money due to the contractor; and the contractor shall have no claim on the Government for any preparation that he may have made, or for any work that has been done, nor for any material which may have been purchased by him for the purposes of this contract.
4. The contractor will have to provide, at his own cost, all labour, plant, tools, material, or whatever else may be required for the due performance of this contract.
5. Bolts, nuts, and washers must be delivered at the Stores Branch of the Post and Telegraph Department, at the rate of two hundred and fifty (250) per week; the first delivery to be made in a period not exceeding three (3) weeks from the notification of the acceptance of the Tender.
6. A deposit of a sum equal to ten (10) per cent. of the total amount must accompany each Tender (without which Tenders will be informal). Such deposit will be retained by the Government until the completion of the contract to the satisfaction of the Electrical Engineer.
7. The Electrical Engineer or his deputy shall at all reasonable times have access to the workshop where the bolts, nuts, and washers are being manufactured.
8. In case the Electrical Engineer or his deputy is of opinion, at any time before the completion of each or any bolt, nut, or washer, or before delivery of each or any of them has been accepted, that any of the bolts, nuts, or washers have been or are being manufactured unsoundly, or imperfectly, or not with proper material, or in any respect whatever not in accordance with the specification or drawing, or with instructions given by the Electrical Engineer or his deputy, either of these officers may give the contractor notice that such defective bolts, nuts, or washers will not be accepted, and the contractor shall have no claim against the Government for any bolts, nuts, or washers so rejected.
9. A drawing of the bolts, nuts, and washers, full size, will be supplied to the contractor.
10. A copy of these conditions, together with the specification, signed by the contractor and duly witnessed, must accompany the Tender.
11. The decision of the Electrical Engineer will be final in all matters of dispute between the contractor and the Government in regard to this contract.
12. The Government does not bind itself to accept the lowest or any Tender.

REGULATIONS FOR MARKING OF LOAD-LINES ON MERCHANT VESSELS.

The Treasury,

Brisbane, 25th February, 1897.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following Regulations made by the Marine Board in pursuance of the provisions of "The Navigation Acts, 1876 to 1896."

HUGH M. NELSON.

Preamble.

WHEREAS by "The Navigation Acts, 1876 to 1896," it is amongst other things enacted that the Marine Board of Queensland may make Regulations for all or any of the purposes in the said Acts mentioned: It is hereby resolved by the said Board, by and with the approval of the Governor in Council, that the following Regulations shall come into force on and after the thirtieth day of April, 1897.

REGULATIONS.

1. These Regulations may be cited as "The Regulations relating to the Marking of Load-lines on Merchant Vessels."

2. The lines to be used in connection with the disc in order to indicate the maximum load-line under different circumstances on all vessels shall be horizontal lines, 9 inches in

length and 1 inch in thickness, extending from and at right angles to an imaginary vertical line marked 21 inches forward of the centre of the disc.

The maximum load-line in fresh water shall be the upper edge of the horizontal line marked abaft such imaginary vertical line, and the maximum load-line in salt water shall be the upper edge of the horizontal line passing through the centre of the disc, as shown in the diagrams hereinafter mentioned.

3. The maximum load-line for fresh water shall be distinguished by the initial letters F.W. conspicuously marked opposite such horizontal line as aforesaid.

4. The said disc and the said maximum load-lines in connection therewith shall be painted white or yellow on a dark ground, or black on a light ground, and the position of the disc and of each of the lines shall in the case of iron and steel vessels be permanently marked by centre punch marks, and shall in the case of wooden vessels be sunk for their breadths into the planking a depth of not less than one quarter of an inch.

5. The position of the disc and the horizontal line passing through its centre, as also the lines to be used in connection with the disc, are shown in the following diagrams:—

Starboard side.

The arrow (→) points in the direction of the vessel's head.

6. Application for a certificate of approval of the position of the disc and of the lines to be used in connection therewith or any alteration thereof shall be made by one of the registered owners of the ship or by the builder of the ship. Every application shall be made in the form marked L.L. 1 in the Schedule hereto.

7. With respect to certificates of approval and their duration, the following rules shall prevail:—

- As regards all classed ships, or unclassified iron and steel ships, the certificate of approval shall cease to have effect when the class of the ship is changed or withdrawn, or when any deterioration has taken place in the structural condition of the ship. Such certificate shall be in the form L.L. 2 in the Schedule hereto.
- As regards unclassified wooden ships which have been opened out for survey, and unclassified iron and steel sailing ships, the certificate will be granted for a fixed time varying with the age and condition of the ship, and at the expiration of such period it shall cease to have effect. Such certificate shall be in the form L.L. 3 in the Schedule hereto.
- As regards unclassified wooden ships which have not been opened out for survey, no limit of time will be imposed in the certificate, which shall be in the form L.L. 3a. in the Schedule hereto.
- As regards all vessels having deck erections in respect of which deductions have been made for freeboard, if any change tending to invalidate the right to such deductions is made in the structural condition of the deck erections, the certificate of approval shall thereby cease to have effect.

8. Every certificate of approval shall be issued in duplicate: one part shall be delivered to the applicant, and the other part shall be forthwith sent to the Secretary, Marine Board.

9. On a certificate of approval ceasing to have effect, application shall at once be made by the registered managing owner of the ship for the granting of a new certificate of approval, and the old certificate shall be delivered up to the Marine Board, who shall cancel the same. In default of a certificate, which has ceased to have effect, being handed in for cancellation, it shall be competent for an officer of the Marine Board to notify any officer of Customs that such certificate is no longer valid, and for any officer of Customs on receiving such notice to refuse clearance to the vessel in question.

10. The master of every British ship shall, before she leaves any dock, wharf, port, or harbour, for the purpose of proceeding to sea, enter in the official log all the particulars stated in the certificate so issued as aforesaid if not previously entered.

11. The managing owner or master shall forthwith, on the delivery to him or his agent of any such certificate as aforesaid, cause the same to be framed and put up in some conspicuous part of the ship so as to be visible to all persons on board the same, and shall cause it to be continued so put up so long as such certificate remains in force and such ship is in use.

12. For the purpose of these Regulations the expression "amidships" shall mean the middle of the length of the load water line as measured from the fore side of the stem to the aft side of the stern post.
